

Reduce downtime with flexible maintenance management

BOBST Maintenance Plus is a one-year maintenance agreement providing preventative support from expert BOBST technicians working alongside your maintenance team. After all, who could be better to care for your machine than the people who created it? Our flexible plan allows regular inspections to be scheduled at times to suit you. It works to maximize your equipment's lifecycle, production quality, and machine availability, providing you with the reliability and consistency to inspire customer confidence. It's reassuring to know that our preventative maintenance has been shown to reduce unplanned downtime up to 60%. You'll quickly receive a full, detailed report of our inspection, allowing you to prioritize and manage recommended actions, and you'll also receive a preferential rate on any preventative or reactive repairs.

Features

Flexible scheduled inspections and maintenance

- Regular inspections by certified BOBST technicians
- Overhaul, defect rectification and parts replacement to minimize failure risk
- Conducted at intervals scheduled with you

Comprehensive report

- Clear, comprehensive report with graphic summary and detailed action plan
- Early identification of issues and recommendations enable proactive maintenance planning
- Includes performance improvement recommendations

Benefits

Strengthen your customers' confidence

- Inspections and support from BOBST technicians, with BOBST-certified parts
- Ensure you meet your customers' needs with increased efficiency and safety
- Deliver reliability, leveraging your competitive advantage

Boost availability, productivity and quality

- Downtime reduction, increasing machine availability
- Best practice shared with your team, strengthening your operators working knowledge
- Maximum efficiency, enhancing your productivity and bottom line

Maximize cost efficiency

- Preventative maintenance extends equipment lifetime, sustaining your production asset
- Prioritization of the repairs for a greater control of your maintenance costs
